

CORE COMPETENCIES

▸ Network Architecture & Engineering

Cloud-native network design (Azure Virtual WAN, AWS Transit Gateway) and hybrid connectivity (ExpressRoute, Direct Connect) · SD-WAN · site-to-site and remote-access VPN · BGP / OSPF routing · F5 BIG-IP load balancing and WAF · Cisco Nexus, Catalyst, ISE · Cisco Meraki · next-generation firewall design · segmentation and microsegmentation · IPv6 · active-active multi-region resiliency

▸ Cybersecurity

Zero Trust architecture and security design reviews · identity and network access control (802.1X, NAC, PKI) · segmentation and microsegmentation · next-generation firewall, IPS, and secure remote access design · SIEM and log analytics · security automation and playbook engineering · NIST SP 800-171 / CMMC 2.0 readiness support · PCI DSS and HIPAA compliance support · FIPS-validated cryptography · security policy and standards development · executive risk reporting

▸ Infrastructure & Security Automation

Terraform / OpenTofu · Ansible · Python · PowerShell · GitOps and CI/CD (GitHub Actions, Azure DevOps) · policy-as-code · automated provisioning, configuration, and compliance scanning · repeatable audit workflows · FinOps and cloud cost optimization

▸ AI Automation & Operations

Private, on-premises, and air-gapped large language model deployment (vLLM, Ollama, llama.cpp) · GPU inference on-prem and in the cloud · retrieval-augmented generation and vector search · agentic workflows and tool integration (Model Context Protocol) · AI-assisted security operations and analyst workflows · model evaluation and guardrails

DIFFERENTIATORS

- **Principal-led delivery.** Every engagement is run by a 15+ year architect who has designed and secured infrastructure for global financial institutions and enterprises — not staffed to junior engineers.
- **Cross-domain under one roof.** Networking, security, and AI automation from a single accountable source; most small firms cover only one.
- **Compliance-fluent.** Hands-on PCI DSS and HIPAA delivery, NIST 800-171 / CMMC readiness support, security-standards authorship, and audit-ready documentation.
- **Vendor-agnostic & portable.** Solutions built on open, modular architectures to avoid ecosystem lock-in.
- **Low overhead, fast response.** Direct access to the senior engineer; quick turnaround on quotes and RFI responses.

PAST PERFORMANCE (commercial — references on request)

- **Global financial institution** (via staffing partner), 2023–present — Cloud network architecture and automation across Azure and AWS for multiple business units; standardized safe onboarding patterns; PowerShell-based cloud cost-management program; automated Cisco deployment via Terraform reducing setup time ~40% and configuration drift.
- **Global software company** (enterprise, ~10 yrs), 2011–2023 — Security architect / principal architect for North America and the global WAN; deployed 802.1X with Cisco ISE and PKI; enhanced Cisco ASA VPN with dual-factor authentication; led global WAN replacement to managed VPN; delivered monthly enterprise security-posture reporting to senior leadership.
- **Small & mid-sized business consulting**, 2022–2023 — End-to-end WAN / VPN / security project delivery; standardized Meraki VPN designs across client environments; built automated network-audit workflows that made client compliance checks repeatable.

COMPANY DATA

Legal name	DMT, LLC
UEI	WTGEV9W2GNJ1
CAGE	9F8F6
Business size	Small Business
Structure	Single-member LLC · For-profit
Established	2021
Website	dmtcyber.com
Location	Alpharetta, GA 30022 · Atlanta MSA · Cong. District GA-07

NAICS CODES

541512	Computer Systems Design Services
518210	Computing Infrastructure, Data Processing & Hosting
541511	Custom Computer Programming
541519	Other Computer Related Services
541513	Computer Facilities Management
517810	All Other Telecommunications
611420	Computer Training

RELEVANT PSC

D302	IT & Telecom — Systems Development
D307	IT & Telecom — IT Systems Analysis
D310	IT & Telecom — Cyber Security & Data Backup
DA10	IT & Telecom — Cyber Security

CERTIFICATIONS & CLEARANCE

- U.S. Citizen
- Former CISSP · Former CCNP (recertification available if required by contract)
- B.S. Telecommunications
